

EST3 Life Safety Hardware

Basic Assembly

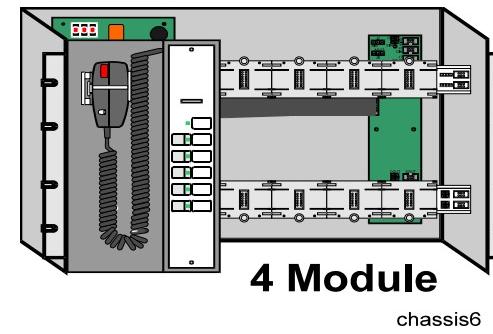

- **Chassis**
 - Footprints for Power Supplies
 - Full Foot Print
 - Half Foot Print

Basic Chassis Assembly

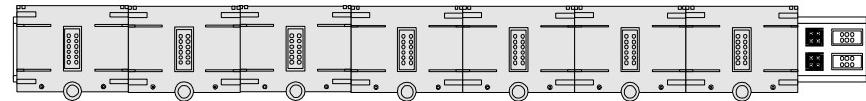

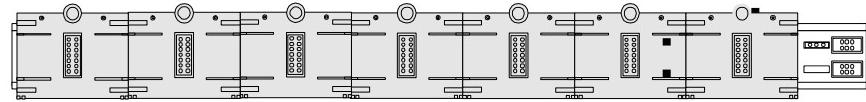

7 Module

4 Module

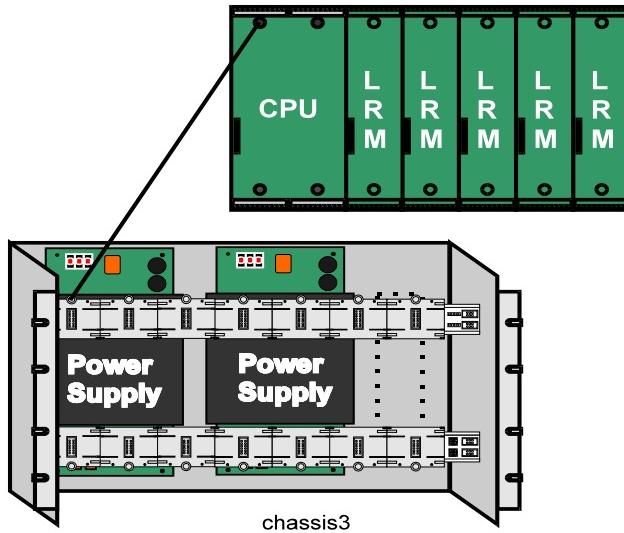

Local Rail

- **Power**
 - +5 Volts
 - +24 Volts
- **RS-485 Communication**
 - System Data
 - Audio Data
- **Address Select**
- **All Fail**

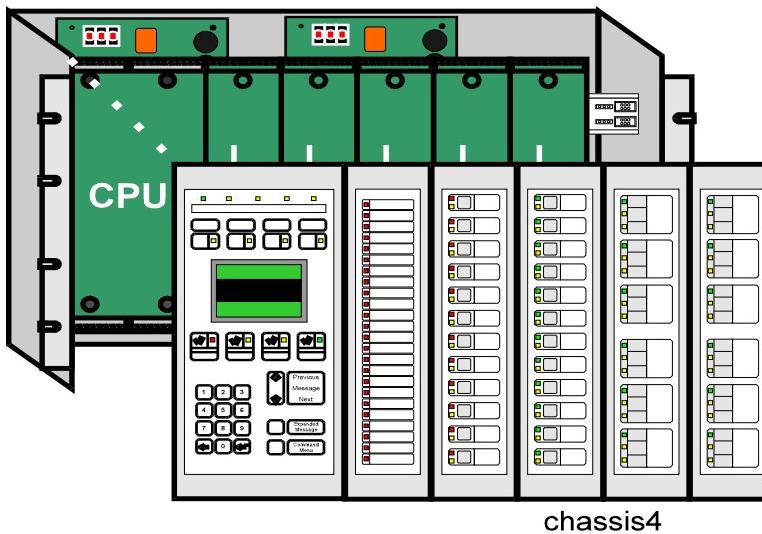

Basic Assembly

- **LRMs (Local Rail Modules)**
 - Building Wiring Interface
 - Control Display Driver

Basic Assembly

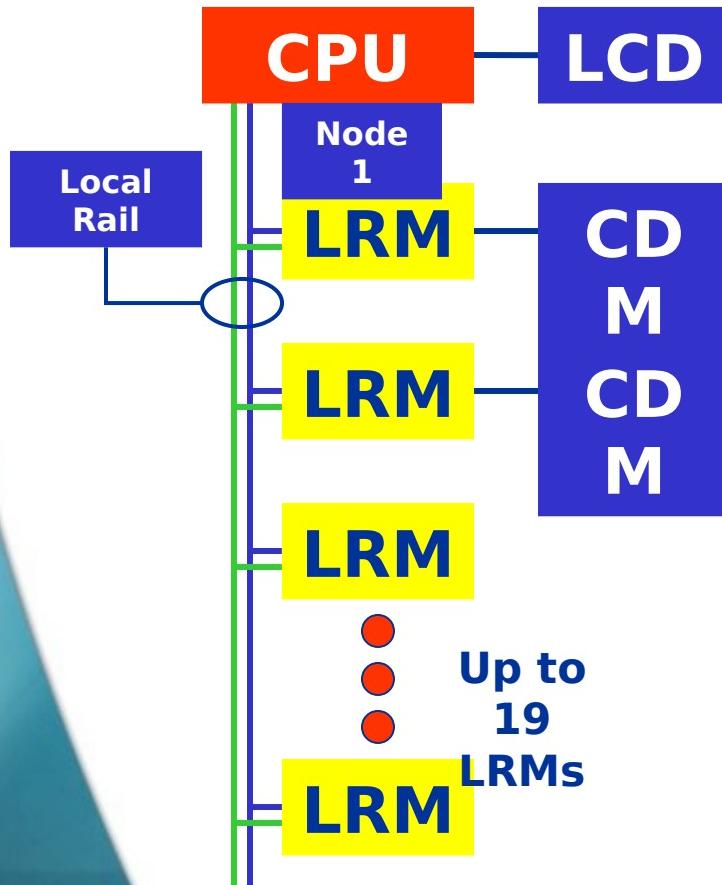

- **Control Display Modules**
 - User Interface
 - Emergency User
 - Maintenance User

- **Cabinets...
Chassis Space**
 - no chassis, 5 LRM
 - 1 chassis, 7 LRM
 - 2 chassis ,14 LRM
 - 3 chassis, 21 LRM
- **Mounting**
 - Lobby
 - Closet

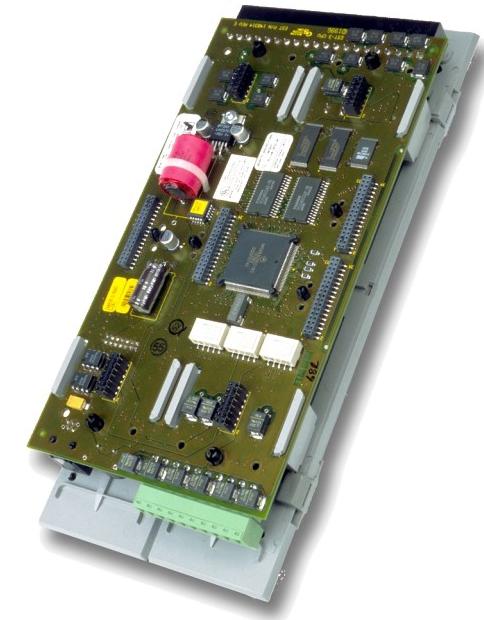

Central Processor Unit Module

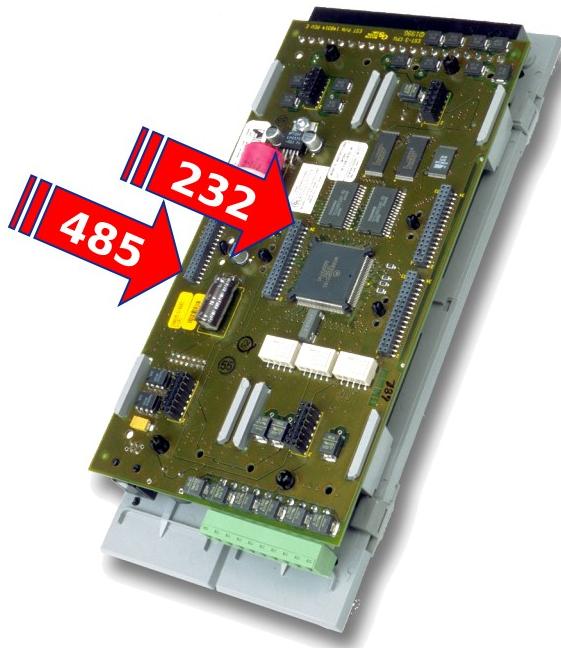

- One per node, takes 2 module spaces
- Downloadable firmware
- Up to 1750 history events
- RS-485 Communication Channels to Local Rail

Central Processor Unit Module

- **Alarm, supervisory, trouble contacts form 'C' bypassed only in test mode**
- **Watchdog circuit**
- **Built-in test functions**
- **Monitor ground fault detection**
- **Low voltage memory write protection**
- **Service LEDs**
- **Internal clock calendar /w leap year**

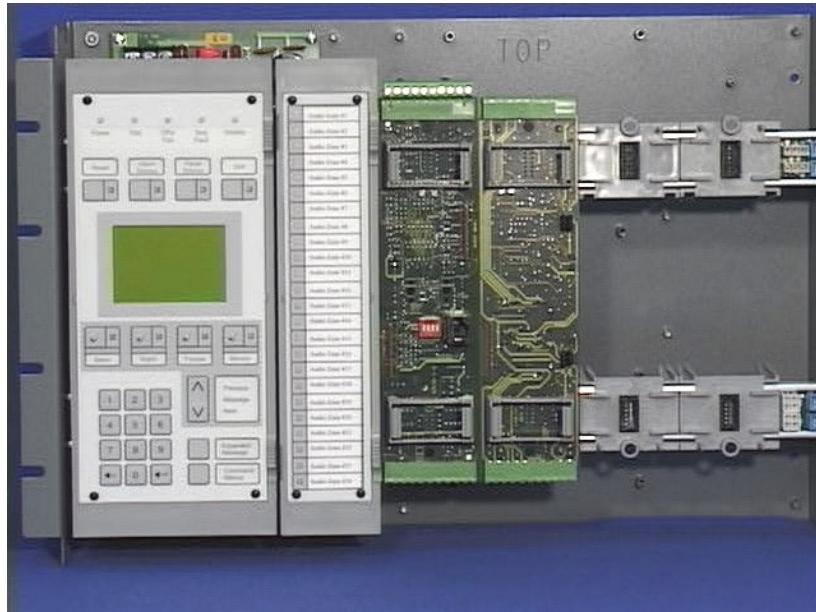

CPU Plug-Ins

- Expansion Slots / Connectors
 - 1 RS-485 Network Communication Channel
 - 2 RS-232 Communication Channels
 - Printers, CIS Interface, Fireworks
 - RJ45 RS232 Download connector

Local Rail Modules

- **Plug to system rails**
- **Interface EST3 to building wiring**
- **Plug-in terminal blocks, #18 to #12 AWG**

Local Rail Modules

- **Non-Volatile memory for program & data**
- **Continual internal self-checks**
- **Common communication and display software on each module**
- **Supports control display modules which are independent of LRM type**
- **Maximum of 8A draw from a point on the rail**

Local Rail Module Types

- Central processor unit module
- Signature data controllers
- Initiating device circuit module
- Audio amplifier modules
- Security access control module
- Modem communicator (Qtr 1/01)
- Switch / LED support module
- Off premise signaling module
- Power supply module

Signature Data Controller

3-SSDC

- **3-SSDC 1 loop per module**
- **3-SDDC 2 loops per module**
- **3-SDC plugs into a SSDC to convert it to two loops**
- **Interfaces Intelligent Signature devices to EST3**
- **125 detectors, 125 modules addresses per circuit**
- **Up to 5 loop rail modules per node, 10 SIGA loops / panel**

Signature Data Controller

- **Circuit alarm detection <= 750 ms**
- **Standalone operation**
- **Style 7 or style 4**
- **'T' taps allowed on class 'B'**
- **Ground fault by circuit and module**
- **NV memory for program & configuration data**
- **Mapping of devices electrical location**
- **Automatic device addressing**

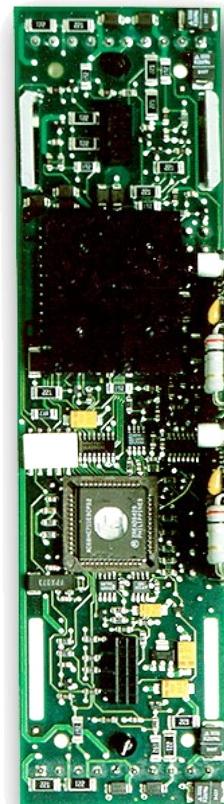

3-AADC Loop Controller

- **Interfaces Addressable Analog Devices**
- **1 loop per module**
- **99 Detectors, 99 Modules / loop**
- **Up to 10 Controllers / node**
- **Ckt alarm detection <=7 seconds**
- **Ground fault / loop, NOT by module**
- **No Mapping**
- **Manual Detector Addressing**

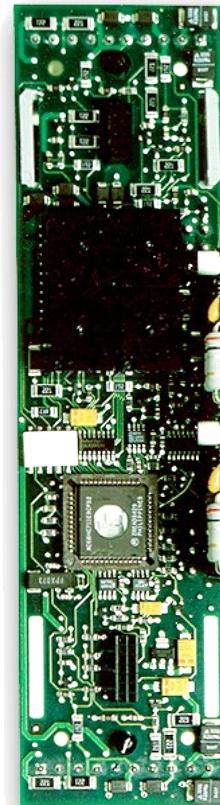

Initiating Device Circuit Module

- **8 style 'B' inputs**
- **Alarm, supervisory, monitor**
- **N.O. Or 2 wire smoke devices**
- **Supports up to 30 photo or 50 ion**
- **Verified, non-verified by circuit**
- **Programmable verification reset & retard periods**

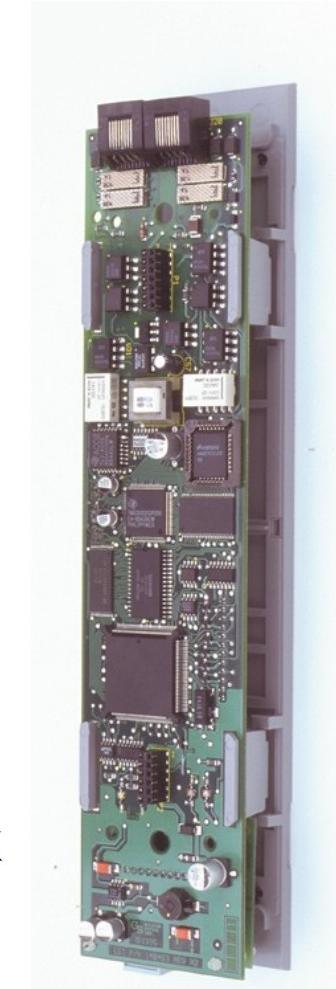

Initiating Device Circuit Module NACs

- 4 circuits convertible to outputs
- Style 'Y'
- Audible, visual, ancillary
- Operates reversing polarity appliances
- 24vdc @ 3.5A, or 70vrms @ 100W
- Electronic **POWER** limiting
- Power from rail, 8A total for module
- Two Single Channel Riser
- Two circuits served by one riser

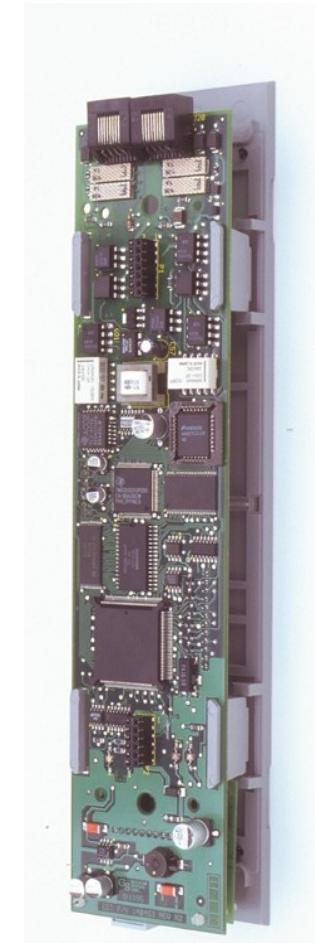

Modem Communicator

- **3- MODCOM**
 - **dual line dialer (DACT)**
 - SIA DCS
 - Contact ID
 - 4/2, 3/1
 - **Survivability**
 - **Buffer 500 events / priority**
 - **80 different monitor stations**
 - Split or multi reporting
 - 255 accounts (tenants)
 - **Multiple MODCOMs per network**
 - **Phone line friendly**

Modem Communicator

- **3- MODCOM**
 - **modem communicator**
 - **access control database downloads**
 - **DACT alarm functions over-ride modem operations**

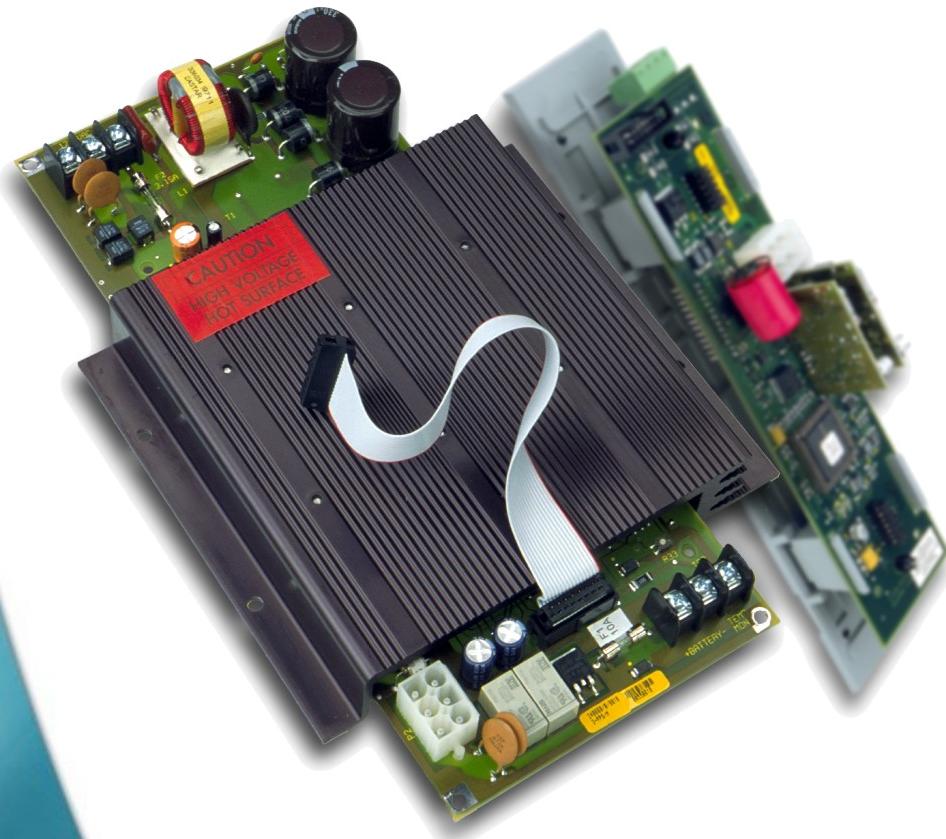

Off Premise Signaling Module

- **Alarm, trouble, & supervisory outputs**
- **Trouble contacts**
- **'Old' & 'new' reverse polarity connections**
- **Local energy municipal loop**
- **Electronic current limiting**

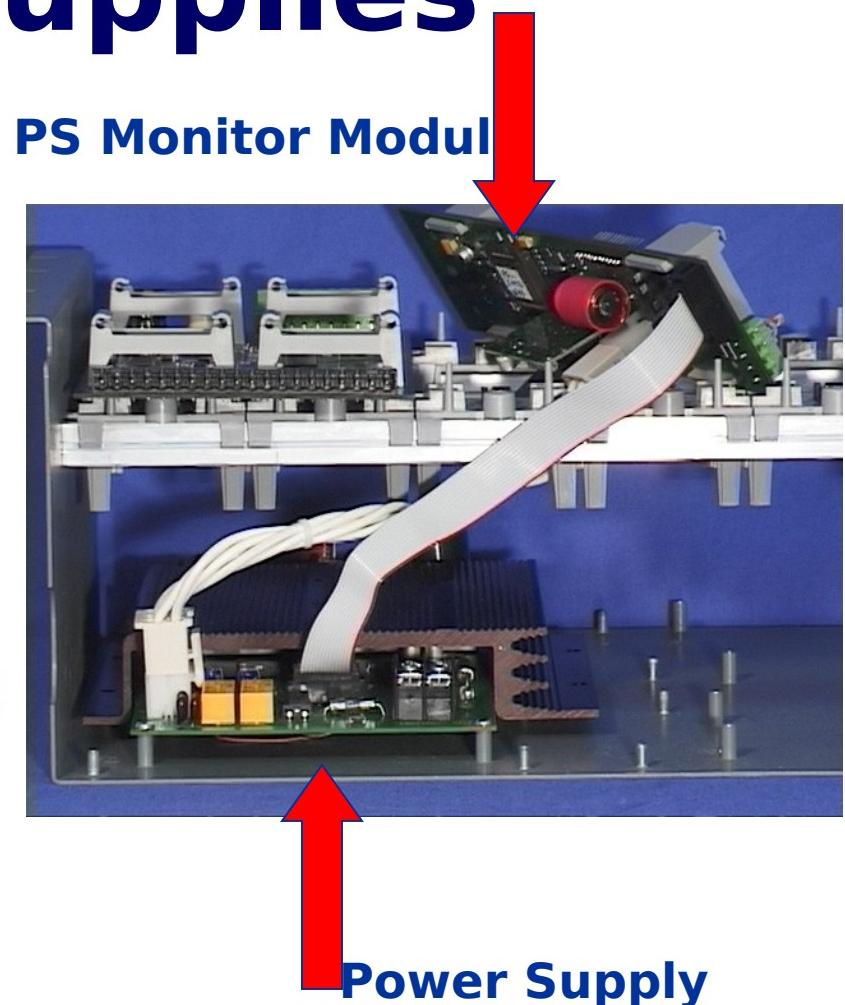

Power Supplies

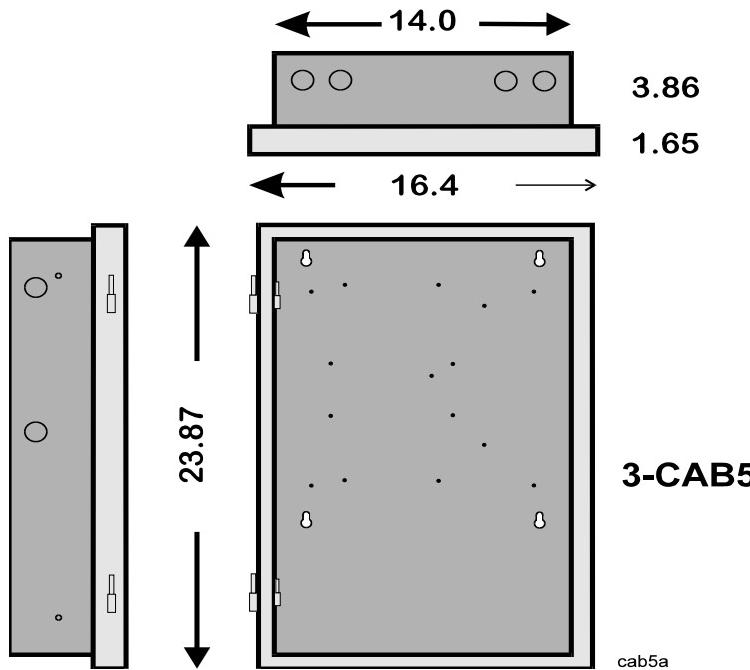

- Master and Booster
- Uses footprint & rail space
- Operate /w parallel output
- Switch mode, 80% efficiency
- Input 120vac or 230vac

Power Supplies

- Output 24vdc @ 7.0A
- Two auxiliary outputs @ 3.5A
- Charges up to 65 AH
- Automatic dual rate
- Temperature compensated
- AC brown & restore
- Electronic current limiting
- Monitors heat sink temperature

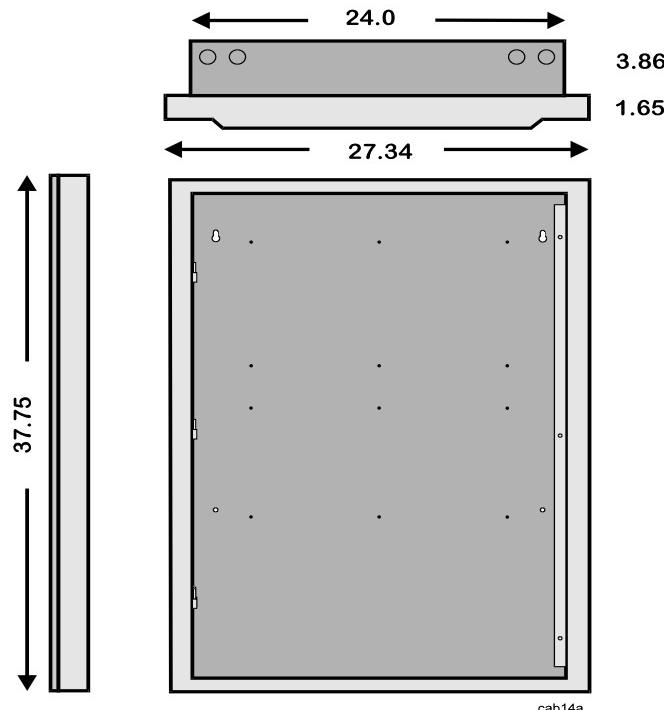

Lobby Mount 3-CAB5

- **3-CAB5**
- **5 rail spaces**
- **battery 10AH**
- **gray wallbox**
- **gray or red doors**

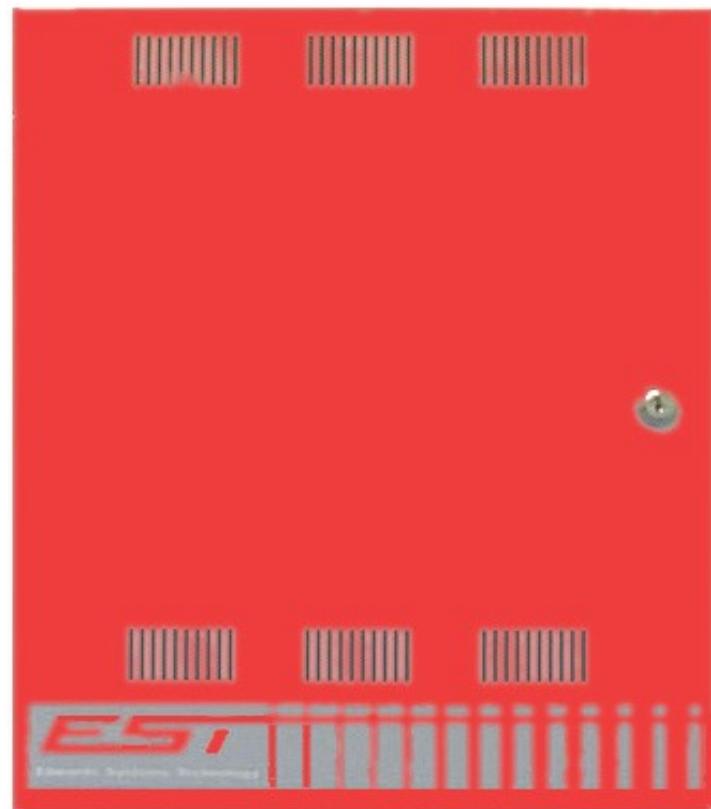

Lobby Mount 3-CABxx

- **3.86 depth, 17AH**
- **3-CAB7, 1 chassis**
 - **Box 23.25H, Door 25.5**
- **3-CAB14, 2 chassis**
 - **Box 35.5H, Door 37.75**
- **3-CAB21, 3 chassis**
 - **Box 47.75H, Door 50.0**
- **gray wall box**
- **gray or red doors**

3-RCCxxR Closet Mount

- **25" Wide, 5.5" deep,
65 AH Batteries**
- **3-RCC7R 1 Chassis**
 - Box 23.975" high
- **3-RCC14R 2 Chassis**
 - Box 36.125" high
- **3-RCC21R 3 Chassis**
 - Box 48.375" high
- **Red wall box, red doors**

EST3 Life Safety Hardware

Thank You!
